**ADVANCED LABORATORY  
QA/QC PRACTICES  
COURSE OUTLINE**

---

---

# **1. INTRODUCTION**

**1.1. *Applicability to Power Plants***

**1.2. *Basis for a Laboratory QA Program***

**1.3. *Overview***

**1.4. *The Quality Assurance Program***

**1.4.1. *The Quality Assurance Procedure***

**1.4.2. *Administrative Procedures***

**1.4.2.1. *Organization and Responsibilities***

**1.4.2.2. *Conduct of Operations***

**1.4.2.3. *Chemistry Sampling and Analyses***

**1.4.2.4. *Chemical Records***

**1.4.2.5. *Qualification of Personnel***

**1.4.2.6. *Chemistry Procedures***

**1.4.2.7. *Deficiencies and Corrective Action***

**1.4.3. *Quality Control Procedure***

**1.4.3.1. *Purpose***

**1.4.3.2. *Verification of Analytical Performances***

**1.4.3.3. *Control of Chemicals, Reagents, and Standards***

**1.4.3.4. *Laboratory Water***

**1.4.3.5. *Control of Volumetric Labware***

**1.4.3.6. *Measurement and Testing Equipment Program***

**1.4.3.7. *On-Line Instrumentation Program***

***1.4.3.8. Interlaboratory Quality Control Program***

***1.4.3.9. Replicate Sample Program***

***1.4.3.10. Control of Bulk Chemicals and Water Treatment Materials***

***1.4.3.11. Fuel Oil and Lubricating Oil QC Program***

***1.4.3.12. Post-Accident Sampling System (PASS) QC***

***1.5. Management Considerations***

***1.5.1. Emphasis of QA/QC Activities***

***1.5.2. Use of Acceptance Criteria***

***1.5.3. Exceptions***

***1.5.4. Final Data Review***

***1.5.5. Effect of QA/QC Program on Workload***

***1.5.6. Training of Personnel***

***1.6. Administration and Review of the Program***

***1.7. Quality Control Practices for the Analytical Laboratory***

***1.7.1. Reagent Controls***

***1.7.1.1. Water Purity***

***1.7.1.2. Dry Chemical and Reagents***

***1.7.1.3. Chemical Standards***

***1.7.2. Laboratory Controls***

***1.7.2.1. Glassware and Plasticware***

***1.7.2.2. Environmental Controls***

**1.8. *Sample Controls***

**1.8.1. Sampling and Sample Conditioning**

**1.8.2. Sampling Controls for Handling Ultra-Pure Water Samples**

**1.8.3. Holding Times and Sample Preservation**

**1.8.4. Sample Chain of Custody**

**1.9. *Summary***

**2. STATISTICS FOR LABORATORY QA/QC**

**2.1. *Introduction***

**2.2. *Characterization of Uncertainties***

**2.2.1. Precision and Accuracy**

**2.2.2. Random and Systematic Uncertainties**

**2.3. *Central Tendency and Dispersion***

**2.3.1. Distributions**

**2.3.2. Characterization of Random Uncertainties**

**2.4. *Statistical Models***

**2.4.1. The Binomial Distribution**

**2.4.2. The Poisson Distribution**

**2.4.3. The Normal or Gaussian Distribution**

**2.4.4. The “t” Distribution**

**2.5. *Stating Uncertainties***

**2.5.1. Confidence Intervals and Predictions Limits**

**2.6. *Propagation of Uncertainties***

**2.6.1. Random Uncertainty Components**

***2.6.1.1. Linear Combinations***

**2.6.2. Propagating Systematic Uncertainties**

**2.7. *Reporting of Data***

**2.7.1. Overview**

**2.7.2. Dimensioning**

**2.7.3. Significant Figures**

**2.7.4. Reporting of Data and Uncertainty**

**2.7.5. Expressing Data Uncertainty**

**2.8. *Tests for Non-Normal Data***

**2.8.1. Introduction**

**2.8.2. Rejecting Outliers**

**2.8.3. Use-of-Probability Papers**

**2.8.4. Kolmogorov Test For Goodness of Fit**

**2.8.5. Testing for a Bias**

***2.8.5.1. Determination of Persuasive Bias***

**2.8.6. The Chi-Square ( $\chi^2$ ) Distribution**

**2.8.7. The “F” Distribution**

**2.8.8. Testing for Equality of Two Means**

**2.9. *Comparative Laboratory Testing***

**2.10. *Least Squares Theory***

**2.11. Summary**

**3. CONTROL CHARTS IN POWER PLANT LABORATORY QUALITY CONTROL**

**3.1. Basis for Control Charts**

**3.2. Control Chart Theory**

**3.3. Recommended Control Chart Practices for Analytical Chemistry Laboratories in Power Plants**

**3.3.1. Analysis of Stable Standards**

**3.3.2. Analysis of Duplicate Samples or Standards**

**3.3.3. Spiked Samples**

**3.4. Recommended Control Chart Practices for the Counting Room**

**3.4.1. Basis for Counting Room Control Charts**

**3.4.2. Control Charts for Gross Counting Instrumentation**

**3.4.3. Control Charts for Gamma Spectrometry Counting Systems**

**3.5. Use of Control Charts**

**3.6. Controls for Establishing Instrument Performances**

**3.6.1. Calibration and Maintenance Schedule for Laboratory Instruments**

**3.6.2. Calibration Theory**

**3.7. On-Line Instrumentation QA/QC Practices Program Overview**

**3.8. Validation of Process Stream Analyzers**

**3.9. Reference Standard Method**

**3.10. Line Sample Method**

**3.11. *Continuous Comparison of On-Line Analyzers***

**3.12. *On-Line Standard Injection***

**3.13. *Cusum Charts***

**3.14. *Quality Control for Radioanalytical Facilities***

**3.14.1. *Introduction***

**3.14.2. *Radioactivity Standards***

**3.14.3. *Instrument Check Sources***

**3.14.4. *Instrument Calibrations***

**3.14.5. *Alpha and Beta Counters***

**3.14.6. *Liquid Scintillation Spectrometer***

**3.14.7. *Gamma Spectrometer***

**3.14.8. *Preventative Maintenance***

**3.14.9. *Environmental Conditions***

**3.15. *Summary***

**3.16. *References***

## **4. DETECTION LIMITS**

**4.1. *Introduction***

**4.2. *Statistical Basis for Detection Limits in Analytical Chemistry***

**4.3. *Other Definitions of LLD or MDL***

**4.4. *Detection Limits Applied to Gross Counting Systems***

**4.4.1. *Derivation Given by Lloyd Currie for Detection Limits (LLD)***

**4.4.2. *Minimum Detectable Count Rate (MDCR)***

**4.4.3. Minimum Detectable Activity (MDA)**

**4.4.4. NRC Regulatory Guide 4.15, Revision 1 Definition of LLD**

**4.5. *Detection Limits Applied to Gamma Spectrometry Systems***

**4.6. *Summary***
